

HealthCast[®] delivers enterprise SSO Solutions for Citrix[®] environments

Securely Streamline User Workflow to Improve the
Quality of Patient Care

HEALTHCAST SOLUTIONS[®]

Providing leading healthcare SSO solutions for over twelve years, HealthCast's solutions include compiled code application connectors and stateless clients to use far fewer Citrix server resources than others, eliminating server overload and downtime. The combined solutions offer clinicians speedier access, smooth SSO roaming, security, and convenience. They are standards-based, leveraging tools IT staff already know and use.

HEALTHCAST has deployed its innovative enterprise SSO solutions in healthcare organizations since 2003. Solutions are architected specifically for healthcare to streamline clinicians' work while enhancing data access security and protecting patient health information. They offer quick access to patient information, secondary authentication for orders and EPCS, 100% success with application integration, and stronger compliance with HIPAA and other regulations. Productivity, security, and access and authentication Innovations that HealthCast has developed since 2003 include, among others:

- Roaming SSO sessions
- Proximity Badge authentication with unique rolling password-save configurations
- Secure multi-user sessions on shared devices
- Multiple approaches to application integration for 100% success rates
- Secure kiosk client mode to keep applications 'always running' during a session for faster access
- Optional PIN to deploy together with proximity badges
- Anonymous Citrix connections to keep applications running hot while supporting badge tap features
- EPCS

Integrates Numerous Citrix Releases

- Fast Connect 3 API
- Integration with Citrix Receiver™ 4.3 and 4.4 as well as earlier versions
- Support for Citrix Storefront™ v3.1.x in addition to earlier versions
- Multiple integrations with Citrix Web Interface and NetScaler Gateway™
- Support for Citrix XenDesktop® 7.6, as well as all previous versions of both Citrix XenApp® and XenDesktop

Explicit, Generic, and Anonymous Published Applications in Same Desktop

- Applications can be launched as explicit, generic or anonymous in the same Windows® session to meet specific workflow goals
- The local Windows user may be explicit, generic, or local, even if the end point device is not a domain member

Consistent user Experience Across XenDesktop Sessions

- Regardless of remote or onsite locations, users have consistent desktop experiences within each XenDesktop session
- Solutions enable users to log into Enterprise Receiver, Web Interface, NetScaler Gateway
- SSO authentication takes place within the XenDesktop session, regardless of access device, including BYOD support

Minimal Footprint on Citrix Infrastructure

- A stateless connection between client and backend services reduces resources required
- No HealthCast components need to reside on the Desktop Delivery Controller

HEALTHCAST SOLUTIONS are secure, enterprise single sign-on solutions that bring convenience and speed to users in both Citrix and non-Citrix environments, so that clinicians can spend more time with their patients. Solutions offer multi-factor authentication, EPCS authentications, Roaming SSO Sessions, integration with any application, robust auditing, etc. In addition, these solutions support Linux®, Windows, and VDI environments.

About Citrix Ready

Citrix Ready identifies recommended solutions that are trusted to enhance the Citrix Delivery Center infrastructure. All products featured in Citrix Ready have completed verification testing, thereby providing confidence in joint solution compatibility. Leveraging its industry leading alliances and partner eco-system, Citrix Ready showcases select trusted solutions designed to meet a variety of business needs. Through the online catalog and Citrix Ready branding program, you can easily find and build a trusted infrastructure. Citrix Ready not only demonstrates current mutual product compatibility, but through continued industry relationships also ensures future interoperability. Learn more at www.citrix.com/ready.

About Partner

Since 1996, HealthCast has designed software to provide physicians, nurses, and other healthcare providers fast, simple, and secure access to patient data so they can focus on patient care without confronting the hurdles of secure computer access to the information they need. Solutions provide unparalleled speed to EHRs and clinical desktops, secure fast-user switching, automated workflow eliminating "clicks", unique proximity badge features, remote access solutions with second factor authentication, and "roaming sessions" to allow users immediate re-access to their work at any computer -- all critical for successful clinician adoption of EHRs, CPOE, and electronic patient documentation.
